

Mayengbam Devasis Singh

+91-8000936467 | m.devasis.singh@gmail.com | LinkedIn | GitHub | Portfolio

PROFILE

AI/ML Engineering student with hands-on experience building machine learning, AI-powered, and full-stack applications using Python, C++, Java, and modern backend technologies. Strong foundation in machine learning, data structures and algorithms, object-oriented programming, databases, REST APIs, and software engineering principles. Experienced in developing practical AI applications and integrating LLMs, NLP, and intelligent systems into software products. Passionate about solving complex problems and building scalable, reliable AI-driven solutions.

EDUCATION

Chandigarh University

B.E. Artificial Intelligence & Machine Learning, CGPA: 8.4

Adinath Public School

Class XII – 84.3%

Punjab, India

2023–2027

Rajasthan, India

2023

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript, TypeScript, SQL, HTML/CSS, GDScript

Backend: Spring Boot, REST API Design, Spring Security, JPA/Hibernate, WebSockets, FastAPI, Flask

Frontend: React, Tailwind CSS

Databases: PostgreSQL, MySQL, MongoDB, Firebase, Supabase

Core CS: Object-Oriented Programming, Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, System Design Fundamentals

Tools: Git, GitHub, Docker, Maven, Linux/Unix, Jira, VS Code, Figma, Godot

Software Engineering: JWT Authentication, API Integration, Modular Architecture, Deployment, Debugging, Unit Testing, Agile Development

PROJECTS

The Compass | React, Firebase, REST APIs

2026

- Developed a full-stack AI guidance chatbot using React, Firebase, and Mistral AI with real-time Server-Sent Events (SSE) streaming and session-based multi-turn conversation memory.
- Engineered an intent classification router and delta-based memory engine with Zod schema validation and dynamic model selection to improve response precision and reduce unnecessary model usage.
- Integrated Cloud Firestore, Firebase Authentication, REST/SSE APIs, and Vercel deployment workflows to support scalable, persistent, and real-time user interactions.

Comp.io – Wordzzle (Ranked Multiplayer Word Game) | Java, Spring Boot, React, PostgreSQL

2026

- Engineered a full-stack real-time multiplayer word game using Java, Spring Boot, React, TypeScript, PostgreSQL, and WebSockets featuring ranked matchmaking, secure JWT authentication, and low-latency gameplay.
- Architected a modular backend using Spring Boot, Spring Security, JPA/Hibernate, REST APIs, and WebSockets supporting ELO matchmaking, reconnect recovery, and persistent match history.
- Containerized and deployed the application using Docker, Render, Vercel, and Supabase while implementing responsive UI, live synchronization, and scalable client-server communication.

YoChan – Desktop Automation Assistant | Python, Linux, APIs

2025

- Developed a Linux desktop automation assistant for application management, system control, and workflow automation on resource-constrained systems.
- Integrated offline wake-word detection and speech processing pipelines delivering sub-200ms response for common commands.
- Designed modular command architecture enabling easy extension, testing, and long-term maintainability.

Squarey Maze – 2D Puzzle Game | Godot, GDScript, Android

2024

- Designed and developed a 2D Android puzzle game featuring 15+ interactive levels and reusable event-driven gameplay systems.
- Optimized rendering, asset loading, and scene management to maintain stable ~60 FPS performance on low-end Android devices.
- Built reusable modular scene architecture simplifying debugging, feature expansion, and long-term maintenance.

ACHIEVEMENTS

1st Place – BAGIC Hackathon (Bajaj Allianz)
1st Runner-Up – Kraf Think Hackathon
3rd Place – HackTech, Thapar University

CERTIFICATIONS

Machine Learning Specialization (Coursera)
GitHub Foundations
Salesforce Trailhead: Quick Start: Apex, Apex Basics & Database

LANGUAGES

Hindi (Native), English (Fluent), Spanish (Beginner), Japanese (Beginner)
